

International Day for Disaster Risk Reduction

International Day for Disaster Risk Reduction began in 1989, after a call by the United Nations General Assembly for a day to promote a global culture of risk-awareness and disaster reduction. The 2019 edition continues as part of the "Sendai Seven" campaign, centred on the seven targets of the Sendai Framework. This year will focus on Target (d) of the Sendai Framework, reduce disaster damage to critical infrastructure and disruption of basic services..
